June 2026 Statistics

SUMMARY

In June 2026, the San Antonio International Airport's passenger numbers reached 938,721. Passenger levels for the month were down 4.3% compared to June 2025 while overall commercial airline capacity for the airport was down nearly 10%.

The airport welcomed two new routes, Breeze Airways launched new seasonal nonstop service to Pensacola (PNS) and Volaris launched service to Queretaro (QRO), joining Viva (VB) in offering nonstop service to this important Mexican city. Additionally, several airlines flew more seats to San Antonio this month than the same month in 2025. The airlines with the largest increases in service year-over-year included American Airlines (AA), Frontier Airlines (F9), and Sun Country Airlines (SY).

Despite these service additions, the exit of Spirit Airlines following its bankruptcy reduced available seat capacity, contributing to passenger levels remaining below 2025.

Additionally, a total of 18,037,833 pounds of air cargo moved through SAT during the month of June 2026, a decrease of nearly 21% compared to the same month in 2025.

For more detailed information, see the charts included.

UPCOMING CHANGES

- **Air Canada (AC)** seasonal service to Toronto (**YYZ**) will conclude in October, marking the end of the airlines current seasonal schedule. Service is expected to resume as part of future seasonal scheduled in 2027.
- **Breeze Airways (MX)** seasonal service to Pensacola (PNS) will conclude in early September. Service is expected to resume as part of future seasonal schedule in 2027.
